ACADEMIC PROJECTS

VEHICLE BREAKDOWN ASSISTANCE - PROJECT

- Developed a web application using Angular for the frontend, Node.js for the backend, and MySQL Workbench for database management to provide real-time assistance for vehicle breakdowns.
- Implemented key features such as service location tracking, user authentication, and an intuitive user interface to enhance user experience.

Adblocker for college labs - MINI PROJECT

- Developed a browser extension/software designed to identify and filter out advertisements on web pages, enhancing user experience by reducing unwanted content.
- Utilized HTML, CSS, and JavaScript to create a visually appealing and responsive design, ensuring a user-friendly experience across different devices.

E-Magazine - Group Project

- Collaborated with a team to develop our college's E-Magazine, providing a digital platform for students and faculty to publish and share content.
 - Utilized HTML, CSS, and JavaScript to create a visually appealing and responsive design, ensuring a user-friendly experience across different devices.
-

PERSONAL PROJECTS

Portfolio - Personal Project

- Designed and developed a personal portfolio website using HTML, CSS, and JavaScript, showcasing skills, projects, and achievements in a clean and modern layout.
- Implemented React.js to create a dynamic and interactive user experience, with reusable components for easy updates and scalability.

E-commerce Website ShopEase - Affordable Products for Everyone

- Developed a versatile mobile application using Android Studio that offers a wide range of affordable products, including electronics, fashion, and study essentials.
- The app features a user-friendly interface, secure payment options, and fast delivery services.
